• leetcode.com/u/ParthDani/

Profile

Third-year Computer Engineering student with a steady interest in picking up new frameworks and languages as projects demand. Has contributed core modules in team projects and helped build a working prototype in a hackathon setting during second year. Balances academic coursework with regular competitive programming contests.

Education

Dharmsinh Desai University

B.Tech – Computer Engineering

Aug 2024 – May 2028

D.R. Amin Memorial School

CBSE Board – PCM

CPI: 9.29 (1st Year) | 8.83 (2nd Year)

Board: 95% | GUJCET: 91.55 Percentile

Technical Skills

Languages

Java, C, C++, Python, HTML & CSS, JavaScript, PHP

Frameworks & Tools

Spring Boot, Django, Hibernate, Maven, React.js, Express.js

Databases

MySQL, PostgreSQL, Oracle, SQLite, MongoDB

Core Concepts

OOP, Data Structures & Algorithms, Design & Analysis of Algorithms, DBMS, Spring Security

Projects

Event Registration System

Individual Project

Java • Spring Boot • Spring Security • Hibernate • MySQL • Maven

- Developed a full-stack Event Registration System using Spring Boot with a layered MVC architecture (Controller, Service, Repository), improving maintainability and testability.
- Implemented secure authentication and role-based authorization with Spring Security, ensuring least-privilege access for attendees and admins.
- Implemented secure authentication and role-based authorization with Spring Security, using BCrypt password hashing and ensuring least-privilege access for attendees and admins.
- Modeled domain entities with Hibernate/JPA and structured MySQL interactions for reliable, ORM-backed persistence.
- Built with Maven for consistent, dependency-managed builds across the project lifecycle.

News Pulse – News Aggregator

Team Project

Python • Django • HTML/CSS • JavaScript • PostgreSQL

- Built News Pulse, a Django-based news aggregator that ingests and normalizes articles from multiple sources, delivering up-to-date feeds via a modular models/views/URL routing architecture.
- Designed the database schema in models.py and structured PostgreSQL queries to support efficient article storage and retrieval.
- Enforced secure user workflows (registration, login, logout) with Django's authentication and session framework.
- Added a text-to-speech feature to improve accessibility, allowing users to listen to articles instead of reading them.
- Structured URL routing and view logic to support scalable addition of new content sources and article categories.

Food Recipe Hub

Duo Project

HTML • CSS • PHP • MySQL

- Co-developed a full-stack recipe web application with dynamic pages and category filtering.
- Established a MySQL-backed database for storing and retrieving recipes, integrated via PHP server-side scripting.
- Applied search and filter functionality using PHP and MySQL queries for smooth user experience.
- Crafted a responsive frontend layout using pure HTML & CSS with no external frameworks.

Competitive Coding

- Active LeetCode problem solver
- Focus: Data Structures & Algorithms in C++
- LeetCode : leetcode.com/ParthDani17

Achievements

- Selected for the first round of Flipkart GRID 8.0, a national-level competitive challenge.
- Participated in CodeQuest ICPC: DDU Edition, GDG DDU
- Participated in DU-Hacks 5.0, a 36-hour national-level hackathon, GDG DDU
- Participated in Code Clash 2.0 (via Unstop), DDU Coding Community

Interests

- Competitive Programming – active LeetCode solver (Data Structures & Algorithms in C++)
- Full-Stack Web Development – Spring Boot, PHP, MERN Stack

Languages

English • Hindi • Gujarati
